We convert your metered gas units to kWh using the following formula:

Metered volume × metric conversion factor<sup>1</sup> × daily calorific value<sup>2</sup> × 1.02264 (volume correction) ÷ 3.6 = kilowatt hours (kWh) used.

<sup>1</sup> We convert the gas use into kWh according to your meter type – 2.83 (imperial) or 1 (metric).

<sup>2</sup> The calorific value of gas changes every day and can range from 37.5 to 43.0. To find out calorific values used to calculate your charges you can visit:
